Re: Sanitary Landfill Permit #1972-5
Chicago Heights, Illinois

Dear Mr. Clark:

Enclosed is a letter we received from Stauffer Chemical Company requesting permission to dispose in our landfill, approximately 1,500 cubic yards of residue from a hot lime soda softener made up of the following components:

- 25% calcium and magnesium carbonate
- 75% water
- 9.0 pH

We would not have any problem handling this small quantity in a one-time deal such as this and we would appreciate it if you would issue us a supplementary permit to dispose of this residue for them.

Yours very truly,

INDUSTRIAL BUILDING OPERATIONS

Leonard A. Swanson

Dear Mr. Swanson:

Stauffer Chemical Company requests permission to dump on your site approximately 1,500 cubic yards of residue from a hot lime soda softener. This softener feeds our boiler. Our chemists have analyzed the residue as:

25% calcium and magnesium carbonate

75% water

9.0 pH

Sincerely yours,

OKile:LG
